**Unit 5 / 2 Aliciajay Circuit Luscombe 4207**

PVC Fencing Warehouse is an Australian owned and operated business that specialises in the supply of PVC fencing. Recently we have seen an emerging trend in PVC fence. The trend in PVC fencing is because:

- PVC is white and resistant
- PVC will not rot and is not affected by water or moisture
- PVC fencing will not fade
- PVC fencing looks amazing
- PVC fencing is affordable and a fraction of the price of a similar looking fully dressed timber fence
- PVC fencing comes with a 30 year Warranty
- PVC fencing is fully recyclable

PVC Fencing Warehouse sources and imports its own PVC products from the best international manufacturers of PVC products. Accordingly we can offer prices that are very well priced without sacrificing on quality. Generally our PVC fencing cost is only marginally more expensive than traditional types of fencing.

## Why Choose Our PVC Fences

1. Full Length aluminium beams inside bottom rails for additional strength

2. Additional strength is added to posts that also hold gates by incorporating a full aluminium beam inside the whole post length.

3. Our PVC fences are all made with 100% virgin material and lab tested with a high concentration of UV blockers and stabilisers to ensure they can endure Australian Conditions.

4. All posts are designed to be concreted into the ground a minimum 600mm. Additional concrete can also be poured inside the post for superior strength although not necessarily required. Posts are also pre routed for a superior finish. End posts, line posts, corner posts and blank posts are all available

5. Greatest range of options and accessories including bolt down posts for installation on concrete and matching gate accessories.
